DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-16, drawn to an exposure method, classified in class 430, subclass 22.
 - II. Claims 17-23, drawn to a mask, classified in class 430, subclass 5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group II and Group I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the mask can be used in a materially different process, such as an electron beam exposure method. The Group II claims are product-by-process claims and are not materially limited by the process steps, but instead are materially limited by the structural features recited.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. Thomas Felger on September 23, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1756

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
